(Reference) Current State of Strategic Shareholdings

The Company sets a policy of examining the economic rationale and future outlook of each shareholding, such as the purpose of shareholding and whether the benefits and risks of shareholding is commensurate with the capital cost and reducing shares by selling them, of which holding is thought to be of smaller significance as a result of such examination.

In the Mid-term Management Plan 2022-2024 (revised in May 2023) announced on May 10, 2023, the Company set the goals of: reducing the balance of strategic shareholdings by 50% by the end of March 2025 from the end of March 2023 from a perspective of improving capital efficiency and cash flows; and reducing the ratio of strategic shareholdings to net assets on a consolidated basis to 20% or less as soon as possible and eventually to 10% or less in the future. The Company has achieved these goals as shown below. The Company does not own deemed shareholdings.
